

- intracellular transport
- vesicle-mediated transport
- cellular amino acid biosynthetic process
- establishment of protein localization to membrane
- Endocytosis
- regulation of response to stimulus
- root morphogenesis
- protein modification by small protein removal
- glutamine family amino acid metabolic process
- regulation of protein modification by small protein cor
- post-embryonic plant organ morphogenesis
- membrane organization
- proteolysis
- cytokinesis by cell plate formation
- protein acylation
- nucleobase-containing compound transport
- photoperiodism
- lysine metabolic process
- Spliceosome
- aromatic compound catabolic process
