

- Ribosome
- response to cadmium ion
- cofactor metabolic process
- chlorophyll biosynthetic process
- response to temperature stimulus
- small molecule biosynthetic process
- plastid organization
- response to oxidative stress
- generation of precursor metabolites and energy
- Phagosome
- cellular amino acid metabolic process
- response to light stimulus
- purine-containing compound metabolic process
- sulfur compound biosynthetic process
- Carbon metabolism
- drug metabolic process
- protein folding
- cellular glucan metabolic process
- tetraterpenoid metabolic process
- ribosome assembly
