

- vesicle-mediated transport
- Oxidative phosphorylation
- photorespiration
- root development
- response to metal ion
- drug metabolic process
- acceptance of pollen
- meristem initiation
- endomembrane system organization
- pyrimidine nucleobase catabolic process
- MAPK signaling pathway - plant
- cell plate assembly
- neurotransmitter biosynthetic process
- cellular response to organic cyclic compound
- response to fungus
- unidimensional cell growth
- protein autophosphorylation
- proteasomal ubiquitin-independent protein catabolic
- small molecule catabolic process
- proteolysis
