

- cellular amino acid metabolic process
- Proteasome
- plastid organization
- embryo development
- organophosphate metabolic process
- plastid transcription
- Spliceosome
- Pyruvate metabolism
- protein-containing complex subunit organization
- intracellular transport
- dicarboxylic acid metabolic process
- amino acid activation
- generation of precursor metabolites and energy
- response to metal ion
- monocarboxylic acid metabolic process
- chloroplast fission
- response to light stimulus
- cofactor metabolic process
- endosome organization
- phyllome development
