

- response to cadmium ion
- cellular amino acid metabolic process
- Carbon metabolism
- Spliceosome
- ER to Golgi vesicle-mediated transport
- drug metabolic process
- sulfur compound metabolic process
- response to decreased oxygen levels
- 2-Oxocarboxylic acid metabolism
- ribonucleoprotein complex assembly
- Glutathione metabolism
- intracellular transport
- aspartate family amino acid metabolic process
- Amino sugar and nucleotide sugar metabolism
- small molecule catabolic process
- protein localization to endoplasmic reticulum
- monocarboxylic acid metabolic process
- Cysteine and methionine metabolism
- Proteasome
- Alanine, aspartate and glutamate metabolism
