

- vesicle-mediated transport
- intracellular transport
- cellular amino acid metabolic process
- regulation of response to stimulus
- establishment of protein localization to membrane
- proteolysis
- membrane organization
- small molecule catabolic process
- protein deneddylation
- endosomal transport
- root hair cell development
- protein quality control for misfolded or incompletely s
- photomorphogenesis
- nucleobase-containing compound transport
- photoperiodism
- endocytosis
- organophosphate biosynthetic process
- organic cyclic compound catabolic process
- monopolar cell growth
- cytokinesis by cell plate formation
