

- intracellular transport
- cellular amino acid metabolic process
- vesicle-mediated transport
- regulation of response to stimulus
- Ribosome biogenesis in eukaryotes
- root morphogenesis
- Spliceosome
- protein modification by small protein removal
- organic cyclic compound catabolic process
- nucleobase-containing compound transport
- dicarboxylic acid metabolic process
- maturation of SSU-rRNA
- protein transmembrane transport
- auxin efflux
- Purine metabolism
- protein quality control for misfolded or incompletely s
- regulation of cell communication
- small molecule catabolic process
- peptidyl-amino acid modification
- drug metabolic process
