

- RNA modification
- photosynthesis, light reaction
- Photosynthesis
- photosynthesis, light harvesting
- chlorophyll metabolic process
- response to light stimulus
- mitochondrial RNA metabolic process
- photosystem II repair
- isoprenoid transport
- Flavone and flavonol biosynthesis
- chloroplast RNA modification
- chiasma assembly
- suberin biosynthetic process
- chloroplast RNA processing
- cutin biosynthetic process
- Limonene and pinene degradation
- cellular response to far red light
- meiotic mismatch repair
- inositol lipid-mediated signaling
- nucleobase transport
