

- intracellular transport
- vesicle-mediated transport
- vacuolar transport
- mRNA processing
- nucleocytoplasmic transport
- Golgi to vacuole transport
- immune system process
- response to drug
- vesicle organization
- 'de novo' CTP biosynthetic process
- negative regulation of gene expression
- negative regulation of gene silencing
- response to hypoxia
- response to disaccharide
- primary miRNA processing
- regulation of stomatal complex patterning
- regulation of vesicle fusion
- vegetative to reproductive phase transition of meriste
- regulation of multicellular organismal development
- response to wounding
